a
No tail: departs in under a second
pitch attitude (deg)
time after gust (s)
loss-of-control attitude (60 deg)
control lost at 0.74 s
no tail
with tail
intended flight lasts ~13 s
b
Tailless craft diverges far faster than it can fly
time to double pitch error (s)
centre of gravity (fraction of chord)
no tail
with tail: stable
(no divergence)
flight duration ~13 s
departs before landing
plausible
hanging CG
